Maritime Pulse: Executive Operations Overview

Executive Pulse Check: Monitor performance against 2025 goals

Executive Overview | Terminal Insights | Disruption Analysis | Filter

Total Movements
15,000
2021 - 2024
+39% vs Prior Year

On Target Performance
7,867
52% of movements
Off-Target (7,133 | 48%)

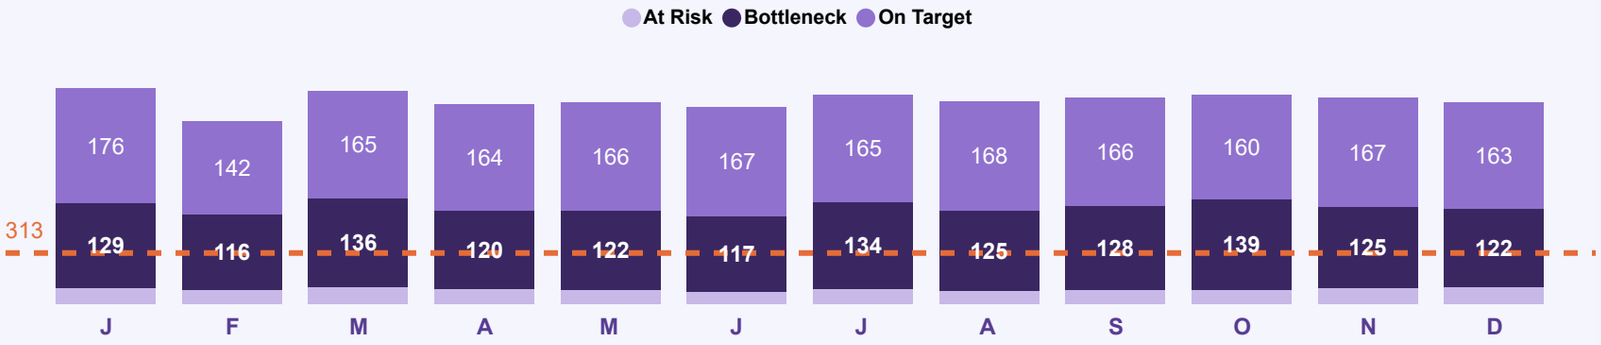
At Risk Performance
1,084
7% Risk Exposure
+39% vs Prior Year

Critical Bottlenecks
6,049
40% Failure Rate
20.9 Days Average Delay

Unique Vessel Count
636
24 Moves/Vessel
80% Capacity Utilized

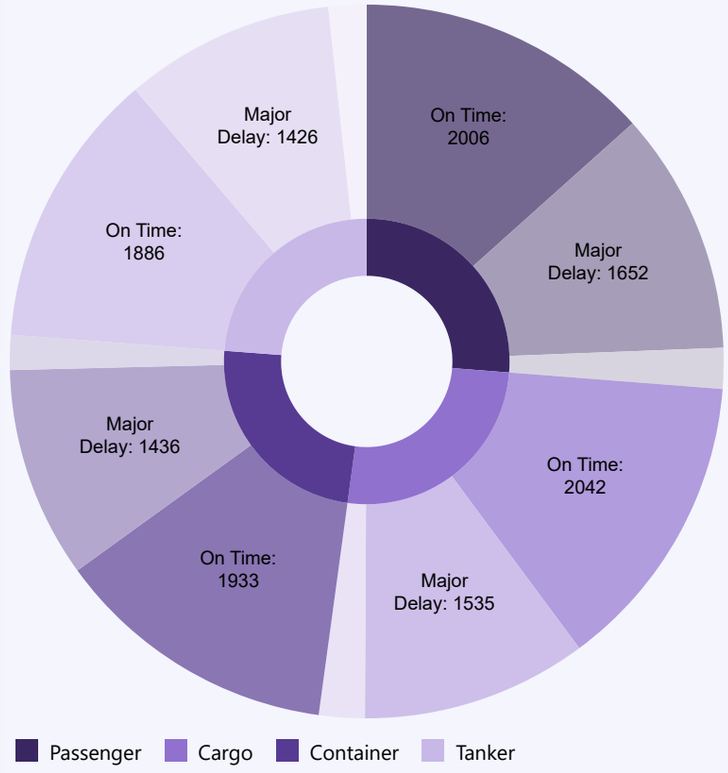
Total Movements by Month & Performance Band

With Average Monthly Movements around 313



Vessel Category Performance Breakdown

Reveals performance risk across vessel categories



Terminal Performance Detail

ID	Terminal Name	Movements	On Target	Bottlenecks	Bottleneck %	Status	AVG Move Days	Avg Variance
45	Jason Melton	304	160	121	40%	AT RISK	20.88	0.9
99	Kayla Mitchell	320	158	137	43%	CRITICAL	21.43	1.4
110	Steven Lynn	302	148	133	44%	CRITICAL	21.60	1.6

Bottleneck & Terminal Deep-Dive

Underperforming = consistently high variance over time
